TASK- 2

DATA PRE-PROCESSIN

AIM

Aim of this task is to conduct preprocessing o
and performance of machine learning models

Importing Necessary

```
[26]: import pandas as pd
      import numpy as np
      from scipy import stats
      import matplotlib.pyplot as plt
      import seaborn as sns
      from sklearn.model_selection import tra
      from sklearn.preprocessing import Stand
```

Load the Dataset

DATA DESCRIPTION:

The dataset used in this project is originally fr
measurements included in the dataset. The da
the number of pregnancies the patient has ha
